

1. Update your Schedule Z to better reflect your usage on your accounts
2. Pay your Supplier through your net metering credits if you are not already doing so (Rows R,S on the spreadsheet indicates this. If it says DUAL you pay your supplier separately)
3. You can make this one time transfer to any of your town accounts (example: Water Dept Account to School Acct)

Information on Schedule Z:

The schedule Z is only for the host customer to fill out. The host customer is the owner of the solar array. Most towns do not own the solar arrays, but participate in Community Net metering, where they purchase credits from a solar field through a solar provider. If the town wants to change their allocations (change the % they have sent to specific accounts) they will need to request that their solar provider update the schedule Z. They cannot change the schedule Z themselves since they are not the host customer.

If the town does own the solar field and they are the host customer, they can submit a schedule Z update themselves. Those forms can be found here:
<https://gridforce.my.site.com/s/article/Massachusetts-Credit-Allocation-Change-Request-Inquiry>

The schedule Z was only allowed to be updated twice a year. This has now been changed to 6 times a year to help you better manage your net metering credits.

Please call or email me if you would like to set up a time to discuss.

The deadline is fast approaching; FEBRUARY 1, 2024

Regards,

Dennis McCaffery
